INJECTABLES

Botox, Filler, and Collagen Stimulators

Wrinkle Relaxers, such as Botox, Xeomin, Dysport, and Daxxify can help reduce fine lines, wrinkles, and add a fresh lift and glow. Filler and Collagen Stimulators are injectables used to restore volume, enhance contours, and create lift in both the face and body. Read on to learn more about these treatment options.

How Wrinkle Relaxers Work

Botox, Xeomin, Dysport, and Daxxify are used to help soften the appearance of fine lines, such as those caused by repetitive muscle movements (e.g. frowning, smiling, squinting). Popular areas to treat include crow's feet, eleven lines, and forehead wrinkles. You deserve to feel confident in your skin and the treatments you choose. That's why we created this guide to walk you through each of our services because investing in yourself shouldn't feel complicated—it should feel empowering.

Xeomin is known to be “naked,” as experts consider it the purest injectable since it is formulated with zero additives. Because of its lack of accessory proteins, the likelihood of building a resistance is decreased.

After a session, it may take around four to seven days to notice its onset. Dysport is formulated slightly differently and is known to treat bigger areas, like the forehead. After a session, you'll typically notice the effects in about two to three days. Wrinkle Relaxers last about three to four months.

- **Membership Price: \$11/unit**
- **Standard Price: \$13/unit**

Dermal Filler

Dermal filler is best for lifting, contouring, and restoring lost volume to the skin. With filler, you'll get natural results that require little to no downtime in recovery. Where you get filler is up to you—lips, cheeks, chin, temples, under-eye, or corners of the mouth—and our experts are here to guide you toward the best treatment for your needs. You can expect results to last anywhere from 6 to 18 months.

- **Membership Price: \$675 per syringe**
- **Standard Price: \$750**

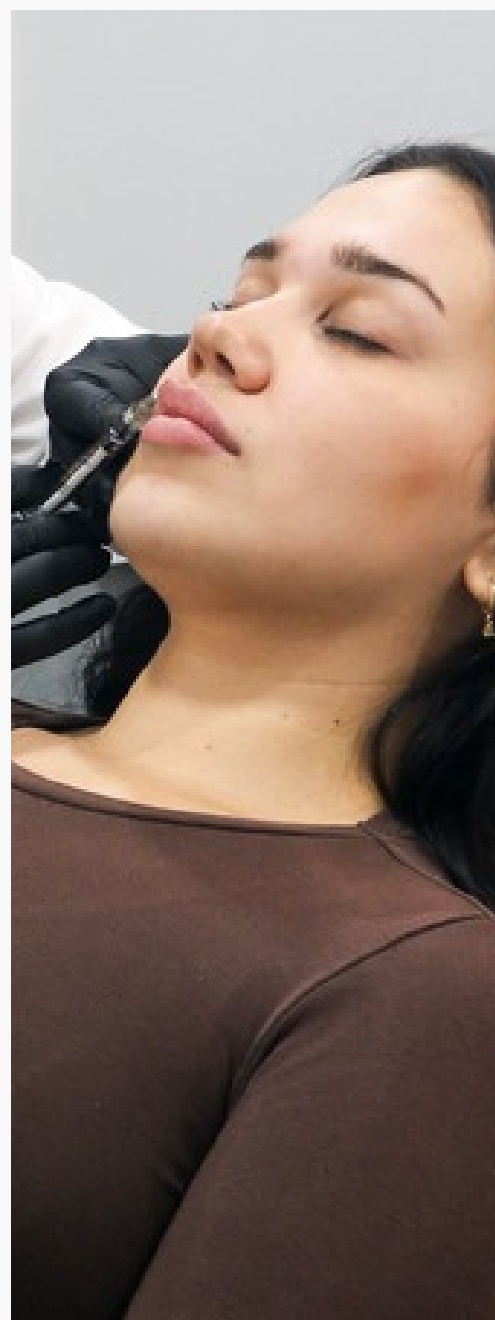

Sculptra Injections for Face & Body

This treatment is designed to be injected into the areas where you desire a fuller or smoother appearance.

Want to keep it natural? Sculptra might be the right treatment for you since it tightens, lifts, and enhances your skin's texture by naturally stimulating collagen production—the protein that gives your skin volume and elasticity. Best of all, the results last up to two years!

Unlike traditional fillers that provide instant results, Sculptra works gradually for a more natural and long-lasting effect. It can also target volume deficits in the buttocks, smoothing hip dips and enhancing overall volume. Depending on your goals, you may need multiple treatment sessions spaced over a few years.

- **Membership Price: \$620 per vial**
- **Standard Price: \$700**

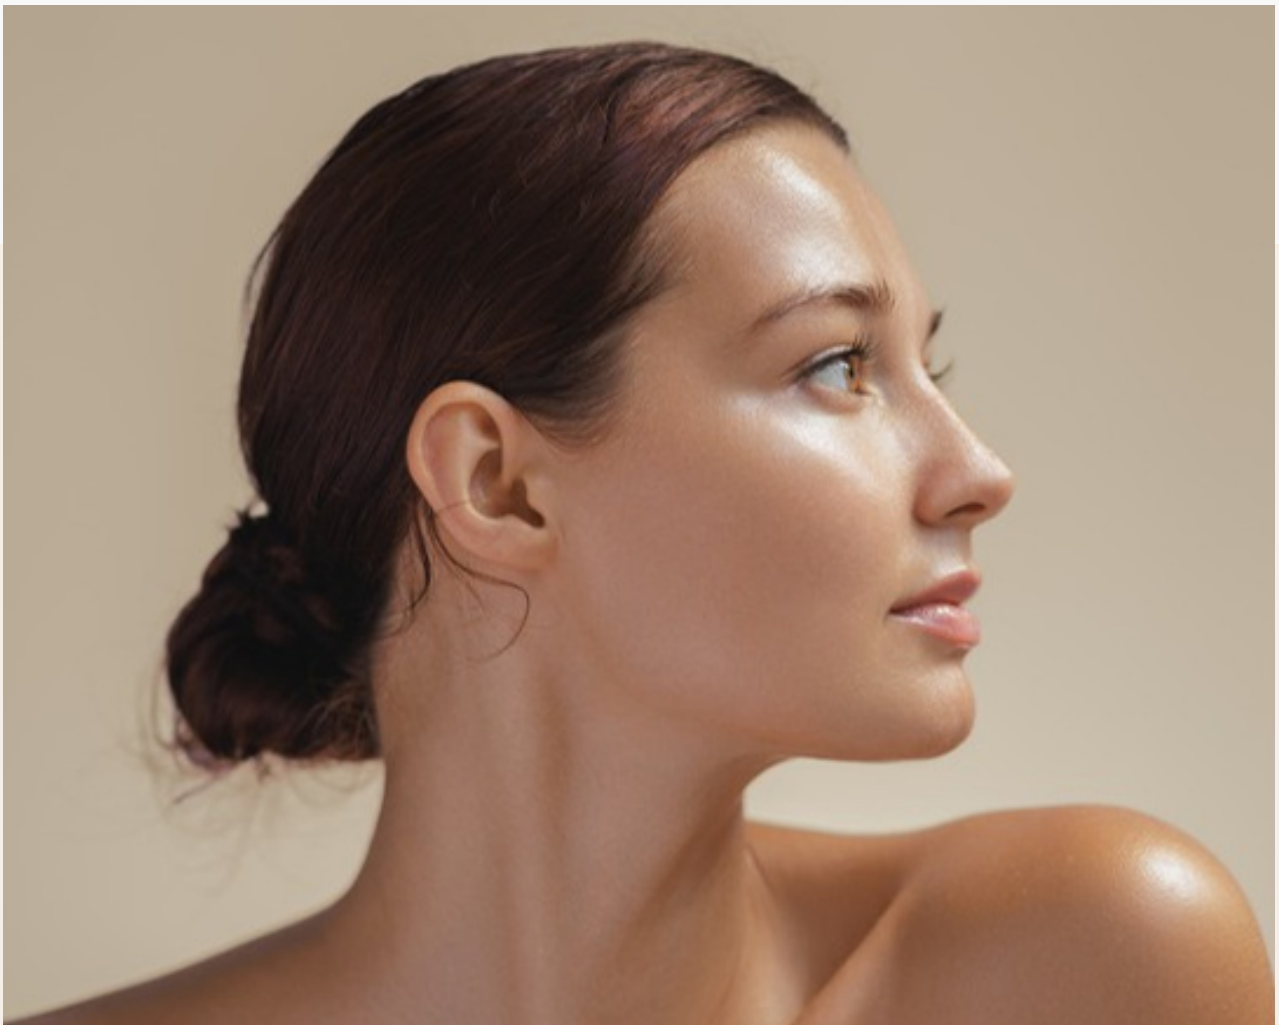

PRP Injections (Face and Body)

PRP, or Platelet-Rich Plasma, is a treatment that uses the power of your own body to give your skin a refreshed glow. It works by stimulating collagen production and encouraging healthier, firmer skin. This treatment is most commonly used for under-eye rejuvenation, hair restoration on the scalp, and anti-aging benefits for the neck and face. The procedure is quick, comfortable, and requires little to no downtime.

- **Membership Price: \$400**
- **Standard Price: \$500**

3 Sessions of PRP Injections

- **Regular Price: \$1500**
- **Non-Member Package Pricing: \$1400**
- **Membership Package Pricing: \$1200**
(Savings of \$300)

Hyperdilute Radiesse

Concerned about volume loss in your buttocks or neck? Hyperdilute Radiesse is a volumizing filler that stimulates collagen production to lift and tighten the skin. The results are instantly noticeable, continuously improve over time, and the effects can last up to two years.

When used on the buttocks (Non-Surgical BBL), this filler enhances volume, accentuates curves, and smooths imperfections like cellulite. Most treatments require a minimum of six syringes, with up to 12 used in one session. This all depends on your needs and goals.

Neck treatments are just as transformative. They target areas to tighten and firm the neck and décolletage area. For best results, two to three treatments spaced six to eight weeks apart are recommended.

- **Non-Surgical BBL Price: \$3,500-\$5,800**

Body Tightening: Neck, Hands, Cellulite

- **Standard Price: \$750 per syringe**
- **Membership Price: \$675 per syringe**

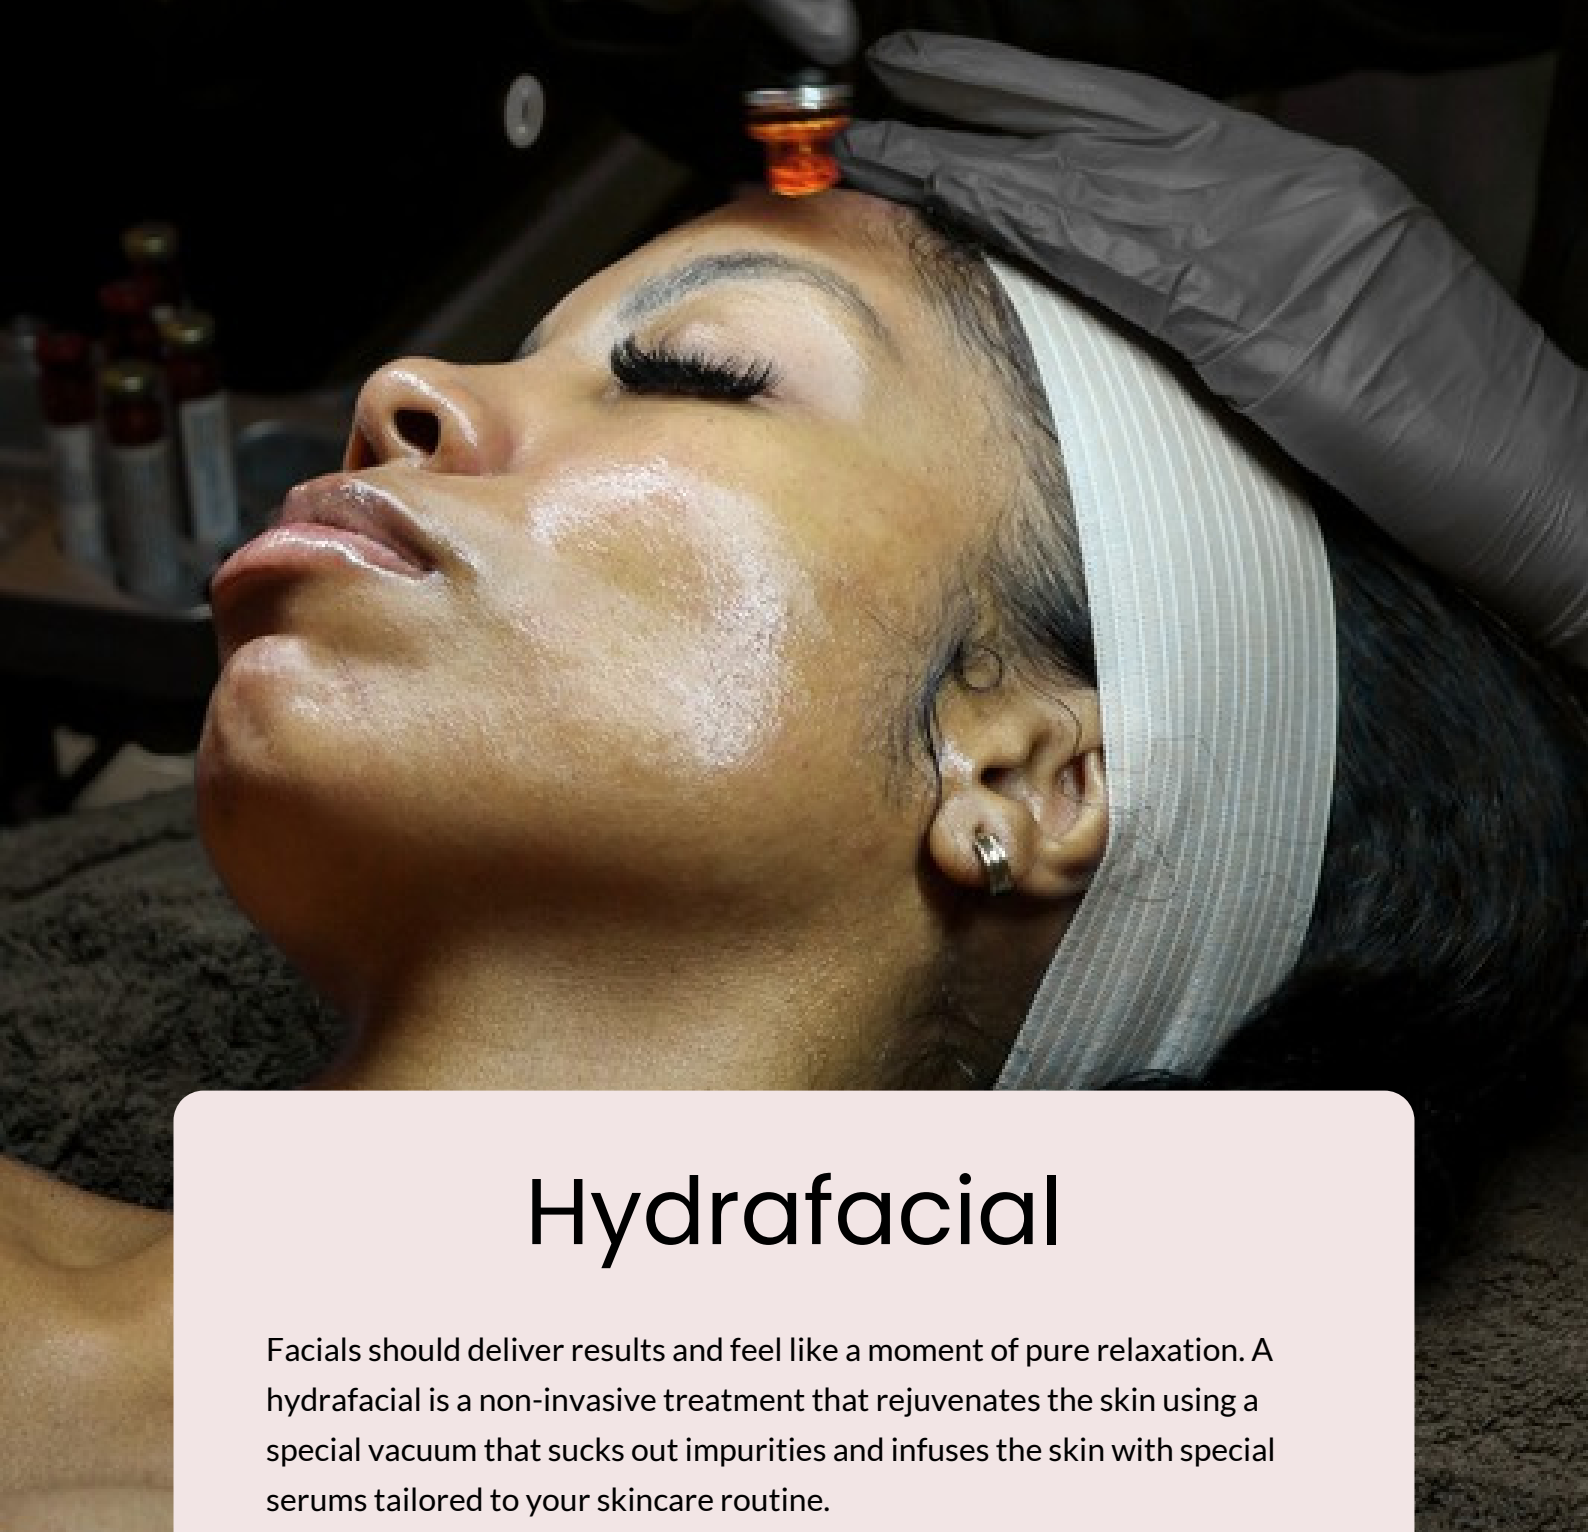

Organic Filler (PRP Gel)

This innovative treatment takes the benefits of PRP to the next level, offering enhanced longevity. Organic Filler (Cellenis Derma PRP) not only provides immediate volume that lasts four to six months, but also addresses the root cause of aging by stimulating collagen and elastin production. As the initial filler naturally dissolves, your body takes over, regenerating its own volume for results that can last up to a year.

This treatment delivers the same benefits as PRP while adding instant fullness and longer-lasting outcomes. It's most commonly used to enhance and restore volume to the entire face, buttocks, and hands. Each treatment requires six to eight syringes of filler and is particularly effective for BBL augmentation.

- **Standard Price: Starts at \$875**
- **Membership Price: Starts at \$760**

Hydrafacial

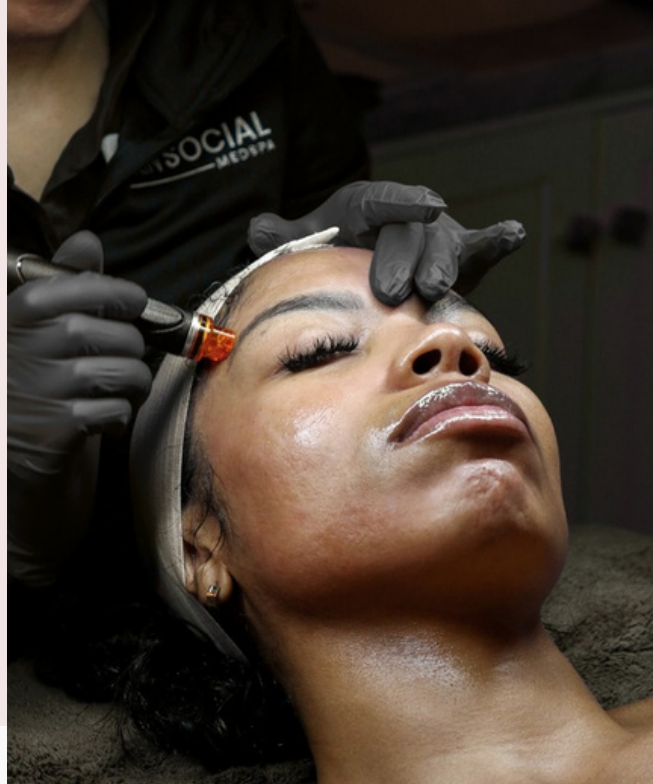

Facials should deliver results and feel like a moment of pure relaxation. A hydrafacial is a non-invasive treatment that rejuvenates the skin using a special vacuum that sucks out impurities and infuses the skin with special serums tailored to your skincare routine.

This facial works in three steps: cleanse and exfoliate, extract impurities, and deeply hydrate. This treatment delivers noticeable benefits like smoother texture, reduced fine lines, unclogged pores, and increased hydration. Hydrafacials can be customized to treat the face, neck, scalp, chest, and body. Every facial is one hour long with extra time allotted for new clients for a specialized skin consultation.

Signature Hydrafacial

Our Signature Hydrafacial is a skin-refreshing treatment that combines cleansing, exfoliation, extraction, hydration, and antioxidant protection. Not only does it remove dead skin cells and impurities, but it also delivers moisturizing serums for results you can see and feel.

Scalp Hydrafacial

We know our skin deserves care, but so do our scalps. The Scalp Hydrafacial takes the same transformative steps as our Signature Hydrafacial—cleanse, exfoliate, and hydrate—but focuses on your scalp instead. Using a specialized handheld device, it removes buildup, unclogs hair follicles, and infuses nourishing serums to support healthier, stronger hair growth. This is ideal for anyone who experiences dryness, excess oil, dandruff, or anyone who just wants a refresh.

- **Membership Price: \$320**
- **Standard Price: \$375**

3 Sessions of Scalp Hydrafacial:

Microneedling

Ready to glow from the inside out? Microneedling is a treatment that stimulates collagen production and encourages new cell growth by using fine needles to create micro-injuries on the skin's surface. This treatment helps to reduce fine lines, deep wrinkles, hyperpigmentation, minimize scarring, and tighten sagging skin. As a bonus, it also enhances the absorption of your skincare products.

- **Membership Price: \$260**
- **Standard Price: \$320**
 - **Special Add-Ons for Neck, Chest, and Scalp: \$50 each**

Microneedling with PRP or Exosomes (for Face & Scalp)

Microneedling isn't just for enhancing skin texture and elasticity—it also supports scalp health. When combined with PRP or exosomes, microneedling stimulates the scalp to repair, restore, and regenerate hair follicles, promoting healthier, thicker hair growth. It's an excellent option for those experiencing hair loss or seeking natural hair restoration. On the face, PRP or exosomes enhance microneedling's benefits by boosting collagen, softening fine lines, and improving overall skin tone and texture. For best results, we recommend scheduling treatments every four to six weeks.

We’ve created a special package for this protocol. For best results, schedule treatments every 4-6 weeks apart to complete three sessions, then maintenance treatments every 3 to 6 months.
